Acknowledge

My profound appreciation goes out to everyone who helped FPT Aptech's Web Design project be developed and implemented successfully. This initiative is a major accomplishment, and I am pleased to acknowledge the important contributions made by each team and individual engaged.

First, I want to express my sincere gratitude to Mr. Le Thanh Nhan, the teachers, and the staff, whose steadfast support and knowledgeable direction were crucial to this project's accomplishment. Their expertise, support, and commitment were crucial in seeing the project through to its successful conclusion. The members of the project team have my sincere gratitude for their unwavering dedication, hard work, and inventiveness. Their cooperation and creative ideas have produced a website that not only satisfies our academic requirements but also serves as an excellent example of high-quality, forward-thinking design.

Additionally, I want to express my gratitude to the professors and Mr. Le Thanh Nhan for their insightful criticism and essential mentoring. His guidance and ideas were crucial in forming the project and guaranteeing that it fulfilled FPT Aptech's goals and expectations.

Lastly, I want to express my gratitude to the alumni, the FPT Aptech management, and all other stakeholders whose continuous encouragement and support enabled this achievement. The FPT Aptech community's camaraderie has been essential to making this project a reality.

To sum up, the Web Design project is a proud example of the collaboration, commitment, and creativity found in our FPT Aptech community. I have no doubt that this website will remain a helpful and significant resource for students, instructors, and the public.

Your Sincerely,

Team Group 03.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JS but to provide us with a real-life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The festival's goals are to improve young people's awareness of other cultures, develop a critical regard for ethnic traditions and distinctive artistic manifestations, especially in the chemical arts, and build a tolerant attitude toward diversity.

In addition to finding and developing talent in a variety of artistic professions, our main objective is to increase awareness of local festivals. Our goal is to inspire participants to reach their greatest potential by providing support during their creative journey.

Additionally, the festival provides a forum for fostering intergroup intellectual, professional, and cultural contacts, enhancing the whole experience and fortifying ties among various communities.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back eprojects@aptech.ac.in as the assigned schedule.

Effective Date: 15-01-2025	Version 1.0	Page No: 1 of 26

Problem Definition

An organization called MOONLIGHT EVENTS organizes festivals all around the world by working with local city associations and municipalities.

These celebrations seek to increase youth awareness of other cultures, encourage tolerance for cultural diversity, and cultivate appreciation for ethnic traits and distinctive artistic expressions.

The organization requires a digital platform that offers thorough details on the many festivals observed around the world, allowing visitors to understand these occasions and their cultural importance.

MOONLIGHT EVENTS is having trouble gathering and presenting event data from various nations. A central platform that not only offers information on these festivals but also classifies and presents it in an approachable, aesthetically pleasing, and easily navigable way is required.

1. Festival Information

- The website ought to provide comprehensive details regarding international festivals, including descriptions, dates, locations, cultural significance, and unique traditions.
- To make browsing easier for users, festivals should be grouped by nation, area, and cultural topics.

2. Galley should be able to filter events on website by country, religion and month.

3. Everyone can understand other cultures, cultural differences, respect national characteristics and unique arts of other countries.

Customer Requirements Specifications

User:

Input/Find:

- Use navigates for country/ religion / gallery or sort by
- Find the event
- Write feedback or contact with us

Process:

- Check confirms of the navigate to list
- Find information of event
- Check the feedback or contact

Output:

- Export all event or gallery form submit
- Export the information events to read or download
- Report the feedback or contact successfully or wrong

Hardware / software requirement:

Software:

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, JavaScript, jQuery, React/AngularJS,
- Figma, XML
- Data Store: JSON files or TXT files

Other Requirements:

- Operating Portal: Windows
- Browsers: Edge, Chrome, Mozilla Firefox, Safari

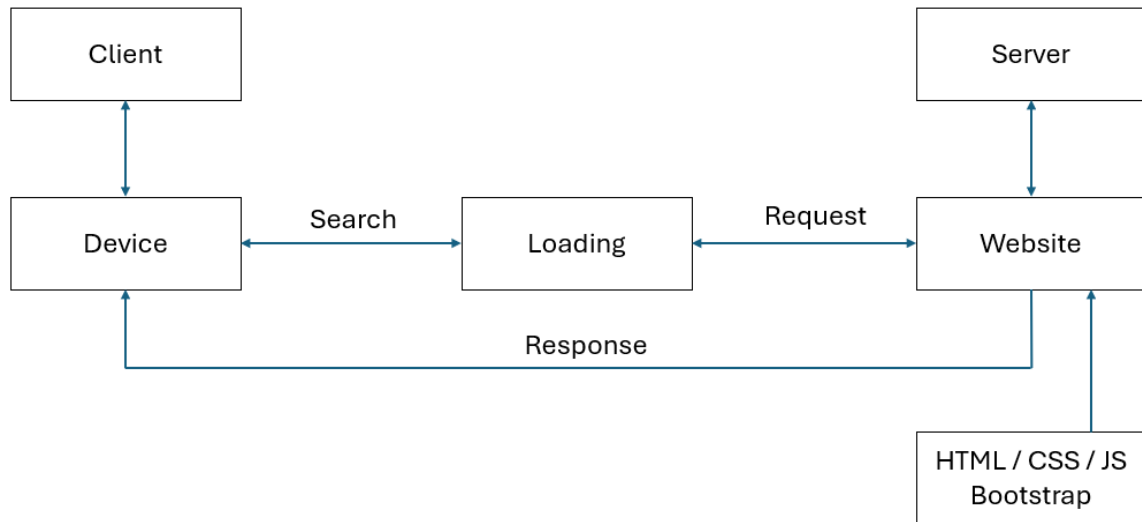

Hardware:

- Intel Core i3/i5 Processor or higher
- 8 GB RAM or above
- Color SVGA
- 500 GB Hard Disk space
- Mouse
- Keyboard

Screen shots

Introduction to the Figma Design Project

The goal of this project is to design a cutting-edge, user-friendly, and intuitive interface for digital platforms. We concentrate on creating a scalable, user-friendly, and uniform design system with Figma as the main design tool.

The project uses advanced UI/UX principles to optimize layout, color schemes, and navigation in order to provide a pleasing solution that satisfies user needs. Because the design system has reusable components (Components & Variants), future development and alterations may be made quickly and effectively.

Furthermore, we use Auto Layout to increase the adaptability of design components so they work well on a range of devices. Additionally, real user experiences are simulated using the Prototyping & Interaction capabilities, allowing for extensive testing and improvement prior to deployment.

The project intends to guarantee usability and scalability by using this technique, therefore maximizing user and customer happiness even when the interface looks aesthetically beautiful.

Submission Checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?
